- Social Networking
- Google Ads
- Confluence
- Jira
- LiquidPlanner
- Facebook Ad Campaigns
- Google Analytics
- Basecamp
- Video Conferencing (Skype, WebEx, Google Hangouts)
- Dropbox

## RELATED EXPERIENCE

### Manitou Group – Front-end developer

July 2016 – Present

Currently, I am employed with Manitou Group and work in West Bend, WI. I am the front-end developer and user-experience/user-interface designer. This position has me applying my technical knowledge of HTML, LESS, CSS3, JavaScript, and jQuery along with Sitefinity CMS development to Manitou Group websites and web applications. This requires me to create custom HTML/Less web pages using bootstrap and ASP Masterpages for Sitefinity CMS. I also use a wide variety of tools and programs to accomplish daily tasks, such as, Visual Studio, Adobe Brackets, Koala GUI, and Sitefinity CMS backend.

### Freelance front-end web developer

June 2012 – Present

### Creative Cow Design – Co-Founder/Front-end developer – (June 2015 – Present)

Creative Cow Design is a Wisconsin Web Design company whose aim is to give its clients the highest standards for web development, custom graphics & logos, hosting, and customer service. Our goal is to give you the website your business needs to succeed.

At Creative Cow Design, we take care of everything so you don't have to worry about anything! We walk you through from start to finish and offer you a free quote for all web development and design work.

Our process starts by asking, "What is best for your business?" Once we establish the correct direction for your business or project, we put a plan together including wireframes, prototypes, graphics, and finally development of the website. We also SEO the site to make sure your business gets found!

#### **Web Niobium – Co- Founder/Front-end developer – (July 2012 – Present)**

In July of 2012, my brother and I decided to start our own web development business, him working as the back-end developer and myself working as the front-end developer. During our time working together we have done many different projects to include websites, eBooks, ecommerce prototyping, and Photoshop mockups for clients.

For freelance projects, I utilize Bootstrap 4, SCSS, HTML5, PHP, JavaScript, and jQuery. These projects also have us using Adobe Photoshop to assist with photo editing, graphic design and alteration, and layout.

#### **Randstad Technologies – Contract front-end developer**

**November 2015 – July 2016**

#### **American Society of Quality - (November 2015 – July 2016)**

I was engaged in a contract position which had me working at the American Society of Quality in Milwaukee, WI. I worked in both .NET and Java environments. My primary responsibilities included front-end development and to technically apply knowledge of HTML, CSS, JavaScript and CMS development to ASQ websites and IT Web Applications. This requires me to create custom HTML web pages and to understand and build web pages that include ASP. I am also creating an online reference guide for Sitecore CMS and training staff on how to use Sitecore to edit, create and update pages. Doing this requires me to use a wide variety of tools and programs such as Visual Studio, Site Studio Designer, Jira, Confluence, Sitecore and custom file transfer programs.

#### **Mondo Digital Marketing – Contract front-end developer**

**November 2015**

#### **YesMail - (November 2015)**

While working with YesMail I was the front-end developer responsible for creating a custom landing page for the Marriott. This landing page was used in an email ad campaign that was sent out to numerous Marriott customers world-wide. To create the landing page I used HTML5, SCSS, CSS, AngularJS, JavaScript, and jQuery. During this project I also utilized many different tools such as Brackets for coding, GitHub, and Browserstack for testing. This was a 100 hour contract position that ran for approximately two and half weeks.

#### **Flexion Inc. – Front-end web developer**

**January 2015 – July 2015**

During my time at Flexion, Inc. Madison, WI, I worked remotely developing a web application for Great Lake Student Loans. I was the primary front-end developer, working with a team of 12. My main responsibilities were to take the PSD mockups and code them out using HTML and LESS/CSS. Additionally, I also assisted the team by testing AngularJS modules with ProtractorJS to ensure code was working effectively and as designed. For this project we used Eclipse as our IDE. Contract concluded when project ended.

## **Robert Half Technologies – Contract front-end web developer**

**September 2014 – November 2015**

### **Promega Corporation - (September 2014 – January 2015)**

During a Five-month temp position at Promega Corporation in Madison, WI I worked in a .NET environment using SiteCore as the main CMS. As a Front End UX/UI Developer my daily tasks involved updating WordPress themes, developing new pages in SiteCore, creating HTML emails for ad campaigns, creating Photoshop mockups for clients, developing the user interface library and updating the Promega Corporation website to be fully responsive using the PURE CSS responsive framework. Doing these tasks included the hand coding of HTML, CSS, and understanding basic PHP for WordPress updates.

### **Journey Mental Health - (October 2015 – November 2015)**

While working for Journey Mental Health I was tasked with converting hard copy paper forms into e-signature forms for medical professionals. Doing this had me using both HTML text editors as well as CX360 (an integrated behavioral health EHR platform) for formatting the various forms. The projects I worked on also had me creating hand coded reusable templates that could be used in a wide variety of different forms. I also performed data entry and updated accounts as required.

## **eMarketing4Business – Lead front-end web designer**

**March 2012 – September 2014**

I began my web development career at eMarketing4Business in Waukesha, WI. My job duties at eMarketing included ensuring all client web design changes and updates are assigned and completed to meet customer requests in a timely manner. This included hand coding HTML, CSS, with some basic JavaScript, & jQuery. I also completed web development tasks and assist clients with IT related issues on their websites and/or email accounts. I was the main point of contact in training clients to correctly make changes to their websites using our WYSIWYG Editor.

## **PORTFOLIO**

I have worked on hundreds of websites, mockups, email marketing campaigns, and been involved in CMS work. For examples of my work you can visit <http://neresume.com/>.

## **EDUCATION**

August 2001 - May 2004

Bachelors of Science - Criminal Justice (Minor - Politics)

Carroll University

Waukesha, WI

## **MILITARY**

May 1997 - June 2001

United States Air Force
